Dear Dr. Bell,

I would like to take a minute to thank you so much for adding to our Prime Time After School Program here at Galindo. We are always on the hunt for excellent teachers to help enrich the lives of our students, and we try to find people and classes that will help expand their minds and develop their curiosity to the world around them. When we found you, we certainly found just what we were looking for!

Through your class, Master Builders, our students jumped at the chance to build and design. It was always one of the first classes to fill, and it was always one of the most well attended classes in our program. (Which says a lot!) The students had a fantastic time and were able to explore the properties of engineering. I hope that one day these kids will realize that opportunities such as the ones they experienced in your class may be found in the real world. They can actually utilize these skills in a real job!

Thank you for helping our kids to have fun, and thank you for providing such a thoughtful program/class. We really did appreciate your sense of professionalism, your careful planning, and your enthusiasm. These children had the opportunity to work with an outstanding community member. I hope we will be able to continue our partnership in the future, and I will recommend you highly to other schools in need of quality after school enrichment.

Sincerely,

Kristin Castano

Program Coordinator
